SALT LAKE CITY KEEPS HUMMING

"Zipping Zion" Still Continues to Lead the Big Procession.

PLENTY OF ACTIVITY IN SUMMER "LAZY SEASON"

Outlook for a Heavy Fall Trade Could Not Be Brighter.

"Favorable developments are notice rible in the business world. Many manufacturing establishments are working avertime to fill their orders. It looks as if the tariff question will be compromised and settled before long. Labor is better employed. Money remains casy at the leading banking centers. It looks as if the crops of the country would again be large. Business conditions in this city and throughout the state are in excellent shape. One only needs to ride around the city to see the growth and expansion locally. Our town may indeed be aptly called, 'The Best Town on Earth,'

may indeed be aptly called. The Best Town on Earth.

The above statement by one of the leading brokers of the city is considered to ever prefity thoroughly the business setuation. Comments by business men during the past week indicate that although the trade of the city is now in the midst of the summer "lazy season." there is activity enough and to spare in some lines, and in scarcely any line has there been a noticeable falling off. "It is not a time of features," was the remark made by a prominent hardware man recently "business is good in all lines. The features, if there are any are, of course, strictly summer goods. Sparting goods, good in preparation for fall trade and goods for vacation are the headliners." The annual summer sales have closed. The buyers of some of the big business houses, especially the furniture houses, have gone east to the big trade centers to select stocks for next year. It is a trifle early for the dry goods buyers to go, but some of the shoc buyers have gone and the heads of other departments will follow suit shortly. In house furnishings it is between scasons, in asmuch as housewives have completed their purchases in this line for the summer and it is yet too far ahead to think of fall furnishings.

Drygoods Active.

Drygoods Active.

Drygoods Active.

Drygoods have been active in ladies' sommer dresses, shirt-waists and ladies' neckwear. The shoe business is getting to be a little quiet, and it has been quiet in summer wash goods. The sale of all sorts of light stuffs has been a feature, and the usual summer novelties have sold well, as usual. On all sides there appears to be a disposition to run off stocks already on hand to prepare for new full stocks.

"It is generally a little quiet from July 15 to August 15, and this year has been no exception," said the hardware man. "Nevertheless, trade has held up remarkably well." One of the leading hardware men of the city said that he was scarcely able to obtain sufficient help and that he needed more men to carry on the constantly increasing business.

men to carry on the constantly increasing business.

The feature in this line of trade has been sporting goods. This includes small calibre rifles, fishing tackle, baseball goods, and especially lents and camp outfits. This last comes from the fact that thousands of people are taking their vacations now and require these outfits for their outing trip through the canvons and mountains. Automobile supplies are well to the front as a feature of trade, and the number of new tires, casing and repair outfits called for is surprising, it is said. The roads are dry and tires are ut up a good deal in the long trips.

A general line that seems to hold up well and is also indicative of the sum-

well and is also indicative of the sum mer season is paint and interior finish. Advantage is apparently being taken of the warm and pleasant weather to of the warm and pleasant weather to renovate thoroughly, paint floors, oil interior finish and put things into general good shape for the coming fall. Builders' supplies are good, it is said, and the market is advancing. Shelf hardware of all kinds is good. There is a heavy demand for hay pulleys, mover knives and sections, hay forks and the like, indicating that the merry and the general section is on.

The sale of small pipe calls attention to the fact that a great many small water systems are being installed in this siste and other states. Harness and other is excellent in both retail and

PLACES DESTROYED AT GALVESTON, TEX., BY THE RECENT STORM

The cuts shown above were given to The Tribune by G. W. Bretz of Galveston, Texas, his home, but he spends his summers in Utah. The mark X shows Bettison pier, where Captain Breton and seventeen others lost their lives during the recent storm. This pier starts from the end of the government jetty and extends north from Bellows Point u distance of four miles. At the end of this pier was a hotel and sports

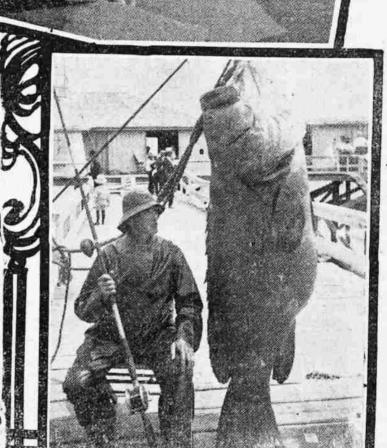

man's resort.

The two pictures of a fisherman and his catch shows, in one instance, the June fish, which weighs 400 pounds, the second, 300 pounds, both of which were caught from the pier with an ordinary rod and reel. Three hours are required to land the fish after it is hooked.

Another picture shows the view of the sea wall, which is four miles long and which protects the city on the Galf side. It is seven feet high, and was built by the government since the city was destroyed by the flood in September, 1900. From this sea wall the government has built a quarantine jetty which extends from the city into the Gulf about four and a half miles. From the end of this jetty the Bertison pier extends to the north four and a half extends to the north four and a half

The view of the sea wall was taken before the fill was made on the city side.

The view showing the monument is simply a picture typical of the city of

Now that the hot days are upon us and we hear of prostrations almost daily it is well to adopt some plan whereby the danger is reduced to a minimum. The first and most important reform is in 150.00 reduced to a minimum. The first and most important reform is in our eating and drinking. The body does not require such coarse, strong food as we have been accustomed to and iced drinks should only be taken in moderation. Most people have learned this lesson and the tendency is now toward a more simple diet. A small quantity of food, properly digested, is a thousand times better than a lot eaten and left to ferment and cause you untold agony. Keep cool and cheerful and if there is anything wrong with your digestion take a dose of Hostetter's Stomach Bitters before each meal. It aids digestion work.

These are the first printed of Galveston in a Salt Lagrange company reports his addition to be gradually dwindling. He expects to have all the ground disposed of within the next few weeks. The work on the constructed at the present time will cost about \$12,000. The building is to be created by Ashton Bros.

Ashton Jenkins company report sales and found ample anuscement in the many concessions of this popular resort. The attendance today was one of the largest of the season.
